

Why EVault Software for Law Firms?

Key Benefits

- Central control
- Complete simplicity
- Immediate recovery
- Secure and compliant
- Cost-effective

“EVault Software enables us to restore files in a matter of minutes.”

—Susie Edberg
Information Systems
Manager,
Aldrich & Bonnefin

EVault® data protection is trusted by hundreds of law firms globally. Since 1997, we’ve delivered easy-to-use, complete solutions, based on world-class EVault technology, that control costs and keep data secure, compliant, and easy to manage and recover.

100% Disaster Recovery

You get the fastest, most reliable online backup and recovery available. In addition, our Professional Services team can help you devise and test emergency procedures and conduct training based on your specific needs. If disaster strikes, you’re covered.

Central Control and Complete Simplicity

Everything is easy, from setup and scheduling to reporting and restores. That includes offices across the hall or across the country, using our web-based CentralControl interface. So it’s easy to satisfy data retention policies. You also control costs—no more otherwise-billable hours spent waiting to restore information. And you also get support from EVault experts—24/7 for critical issues.

Certified, Compliant Security and Privacy

EVault Software makes it easy to comply with regulatory requirements, including Sarbanes-Oxley. The 256-bit AES encryption, an approved Federal Information Processing Standard, shields data in transit and in storage, and there’s no “back door” to let anyone view protected information, not even i365. There are no tapes or physical transport involved—EVault Software’s online, disk-to-disk backup eliminates human error.
